

**THE MUSIC KLUB**  
CREATIVE DEVELOPMENT

The Music Klub provides education, training and mentoring programmes for young people in particular supporting hard to reach groups including young people at risk of disengaging and/or disengaged with education, training and employment, ex-offenders and young people from disadvantaged environments.

Established in 2009, we deliver positive, engaging workshops and short courses for young people to support their education and employment skills needs. Recognizing that young people are inspired by the creative arts and media industries, our programmes embed innovative, cutting edge social media and creative platforms designed to engage and promote social inclusion and expression whilst developing essential skills, knowledge and self-esteem to support their career development.

Our core aims include:

- Assisting young people to develop their confidence and self-esteem to access education, training or employment in the wider community
- Promoting positive mentoring schemes that facilitate advice and guidance forums designed to meet their social needs
- Developing creative, innovative programmes to support and inspire young people in their development and preparation for further education and employment
- Working in partnership with the local community including schools, colleges, social services and community groups to provide holistic support for young people

Currently, we deliver three programmes:

- Positive Impact Program - supporting young people impacted by negative events in their lives to positively change their perspective and attitude to become inspirational citizens in the community
- Mind & Melodies - enabling young people to build confidence, promote self-expression whilst developing and exploring working in the creative media
- Music vs Crime - interactive workshops exploring the relationship between music, young people, crime activity and violence to develop positive outcomes and self-expression

We deliver holistic, person centered support programmes, enabling us to provide 1:1 support, group sessions and integrated community support as required and appropriate for young people's personal development.
